

Visualizing How AI Is Reshaping the Developer Ecosystem

Team 11

Jaehoo Kim, Sungyong Park, Hyeon So, Kangwoo Lee

1. Target Users

- Target users who need to **understand where they stand and what to prepare for in the age of AI**

Job Seeker

- Skills to learn
- Hiring trends
- Entry barriers
- Career direction

Junior Developer

- Current competitiveness
- Upskilling priorities
- Salary growth
- Career development

Senior Developer

- Market positioning
- Leadership value
- AI adaptation
- Long-term relevance

2. User need

- AI is rapidly reshaping developers' work, salaries, and career paths.
- Yet developers still lack clear evidence to understand where they stand and what they should prepare for next.

3. Data

Stack Overflow Developer Survey 2021 - 2025	GitHub Innovation Graph
• 49,000+ respondents (2025), 177 countries, ODbL • Individual-level (1 respondent = 1 row) • Key variables: JobSat, CompTotal, DevType, AISelect, AIThreat Developer's perspective on AI, salary & satisfaction	• 2020 Q1 – 2025 Q3, quarterly, country-level aggregate, CC BY 4.0 • Key variables: language, developer_count, economy, quarter Which languages are growing in the AI era

4. Key Takeaways

- AI fear is overblown, but AI adoption is already linked to real career payoff.
- The main risk is not replacement, but losing verification, debugging, and judgment skills.
- Future-ready developers need AI fluency, human judgment, and momentum-based skill choices.

5. Future

- Add personalized recommendations based on role, experience level, country, and career goal.
- Expand filters for deeper comparison across regions, job types, and seniority groups.
- Use longitudinal data to track how AI adoption changes salary, skills, and career paths over time.

Thank You
